

Vistore™ Cu 580 – Copper Hydroxychloride

...superior technology for today's mineral challenges

Guaranteed Analysis:

Copper (Cu) min – 58%

Vistore Characteristics

- Bioavailability – improved over sulfate and oxide source minerals
- Solubility – highly soluble
- Purity – high concentration of target mineral
- Stability – premix stability and protection from antagonists
- Quality – low heavy metal content

Copper Functions to Support*:

- Collagen synthesis and maintenance
- Enzyme function
- Red blood cell maturation
- Reproduction
- Immune response

Copper Deficiencies May Contribute to:

- Bone and joint disease
- Tendon and ligament issues
- Poor coat quality
- Early embryonic loss

*Copper is frequently fed at rates higher than recommended nutritional levels in poultry and swine for growth performance or therapeutic benefits.

Vistore Cu 58%

Typical Chemical Analysis

Cu	58%
Cl	18%
Cu ² (OH) ³ Cl.....	98%
Zn.....	200 ppm
S	110 ppm
Na.....	105 ppm
Fe.....	75 ppm
Ca.....	45 ppm
Al.....	40 ppm
K	30 ppm
Ni	30 ppm
Cr.....	10 ppm
Pb	20 ppm
Cd.....	5 ppm
As.....	20 ppm
Hg.....	0.2 ppm
Moisture	0.5%

Typical Chemical Analysis

Color	green
Fineness.....	95% thru 60 Mesh

Apparent Bulk Density

Loose	85 lb/ft ³
Tapped.....	109 lb/ft ³
Package.....	50 lb bag and 2000 lb tote
