

THE MINERAL PORTFOLIO THAT STACKS UP TO PERFORMANCE

Quality matters when it comes to minerals. Help optimize your nutritional program for dairy, beef, poultry, swine and companion animals with the performance portfolio you can count on.

PERFORMANCE

Animal Health Advantages of Feeding Minerals:

- Helps improve reproductive performance.
- Helps improve immune system performance.

VALUE

In addition to reducing the cost per unit of metal, mineral concentrations are increased which can help reduce inclusion rates.

BIOAVAILABILITY

Effective mineral absorption results in higher mineral concentrations in target tissues.

QUALITY

Our Dynamic Quality Assurance® process confirms product purity and consistency while minimizing contaminants and heavy metal inclusion.

FAMIQS  FSSC 22000

STABILITY

All raw ingredients and finished mineral products are thoroughly tested and analyzed for ingredient stability throughout manufacturing and mixing. By being less reactive within the total diet, ingredient interactions are reduced - which ensures delivery of the target mineral to the animal.

The Phibro Mineral Portfolio:

PHI-CHROME **Vistore** **Selenium Yeast 3000** **GemStone**
