

Vistore™ Cu 580 – Copper Hydroxychloride

...superior technology for today's mineral challenges

Guaranteed Analysis:

Copper (Cu) min – 58

Vistore Characteristics

- Bioavailability – improved over sulfate and oxide source minerals
- Solubility – highly soluble
- Purity – high concentration of target mineral
- Stability – premix stability and protection from antagonists
- Quality – low heavy metal content

Copper Functions to Support*:

- Collagen synthesis and maintenance
- Enzyme function
- Red blood cell maturation
- Reproduction
- Immune response

Copper Deficiencies Contribute to:

- Bone and joint disease
- Tendon and ligament issues
- Poor coat quality
- Early embryonic loss

Vistore Cu 58%

Typical Chemical Analysis

Cu58%
Cl18%
Cu ₂ (OH) ₃ Cl98%
Zn	200 ppm
S	110 ppm
Na	105 ppm
Fe	75 ppm
Ca	45 ppm
Al	40 ppm
K	30 ppm
Ni	30 ppm
Cr	10 ppm
Pb	20 ppm
Cd5 ppm
