

A multi-strain Bacillus product for environmental, industrial, institutional and household consumer applications.

Bacilox XL is a stable, multi-spore culture concentrate that provides a foundation for formulating quality, performance-based microbial products.

Bacilox XL bacterial strains were selected for their dynamic enzymatic abilities. They are capable of degrading various organic compounds, including proteins, starches, carbohydrates, fats, oils, greases, cellulose and urine.

Each lot of Bacilox XL is subjected to stringent quality control procedures that ensure high microbial count, viability and product safety. The microbial strains are naturally occurring, environmentally safe and non-pathogenic.

Bacilox XL is composed of *Bacillus pumilus*, *Bacillus amyloliquefaciens* (Synonym: *Bacillus velezensis*), *Bacillus licheniformis* and *Bacillus subtilis* subspecies *inaquosorum*.

Formulated applications may include:

Water Treatment	Surface Treatment	Soil Treatment	Waste Treatment
Septic systems	Hard surface cleaner	Carpet and fabric care	Dumpsters
Drain lines and grease traps	Portable restroom cleaner	Pet odor/spot remover	Animal waste/ processing plants
Aquaculture	Urinal/toilet cleaner		
Lagoons	Odor eliminator		
Industrial wastewater
