ANIMAL HEALTH CORPORATION

HEALTHY ANIMALS. HEALTHY FOOD. HEALTHY WORLD.®

**OmniGen® AF** nutritional specialty product can provide immune support to help maintain herd health through some of your dairy's toughest challenges.

- Feed 56 g/hd/day (0.125 lb/hd/day) to all cows in the dry period through early to mid-lactation to help optimize immunity, health and productivity in the first 100 days in milk. For calves and heifers feed 10g to 14g/hd/day up to 400 lb of body weight. When over 400 lb feed 4g per 100 lb of body weight.

**OmniGen® Pro** nutritional specialty product, helps support healthy immune function.

- Feed 63 g/hd/day (0.14 lb/hd/day) to all cows in the dry period through early to mid-lactation to help optimize immunity, health and productivity. For calves and heifers feed 11.25 g to 15.75 g/hd/day up to 400 lb of body weight. When over 400 lb feed 4.5 g per 100 lb of body weight.

**Animate®** anionic mineral helps to optimize calcium metabolism in the pre- and postpartum transition cow.

- Feed a minimum of 21 days prior to calving at a suggested rate between 1.2 to 1.5 lb/hd/day.

**AB20®** reduces available moisture in feed. Lower moisture in feed reduces the potential for mold growth. Some molds can produce harmful mycotoxins. The use of AB20 helps reduce mold growth and mycotoxin contamination.

- To be fed to all groups of cows at 2 to 8 oz/hd/day.

**Cellerate Yeast Solutions®** yeast culture products help support optimum rumen function.

**Culture Classic HD** is a high-density formula based on our original yeast culture.

- Feeding rate for calves, pre-fresh, fresh and lactating cows is 0.5 oz/hd/day.

**Culture Classic** is created with a double fermentation process.

- Feeding rate for calves, pre-fresh, fresh and lactating cows is 2 oz/hd/day.

**Culture Classic Plus** is fortified, providing benefits from yeast culture, yeast cell wall and live yeast.

- Feeding rate for calves, pre-fresh, fresh and lactating cows is 0.5 oz/hd/day.

**GemStone®** organic trace minerals support optimal nutrition.

- **Zn:** Feeding rate of 1.4 g/hd/day.
- **Cu:** Feeding rate of 0.5 g/hd/day.
- **Mn:** Feeding rate of 0.95 g/hd/day.
- **Fe:** Feeding rate of 3.0 g/hd/day.
- **GemStone 4:** Feeding rate of 3.5 g/hd/day.
