

GemStone® for Companion Animals

...superior mineral products for today's nutritional challenges

GemStone organic trace minerals are specifically formulated for current feeding programs. GemStone products combine years of leadership in the mineral business with the research expertise customers have come to expect from Phibro Animal Health Corporation.

Research with highly bioavailable sources of trace minerals (copper, zinc, manganese, and iron) in companion animal feeding programs has shown:

- *Improved mineral absorption*
- *Enhanced hair coat*
- *Support of bone and cartilage synthesis*
- *Immune system support*
- *Assistance with bone growth and collagen synthesis*

Ask for GemStone minerals in your companion animal diets to help achieve improved health and performance.

Talk with your feed supplier or nutritionist and ask for GemStone minerals from Phibro Animal Health Corporation. Call 800.677.4623 or visit www.pahc.com.
