

**Your Partner in Raising Healthy Animals.**

At Phibro, we specialize in helping producers raise healthy animals so they can maintain a healthy bottom line. This requires more than just the right products. It requires the right partner that provides effective solutions and exceptional support every step of the way. That's why we work with you to provide a range of industry-leading technologies and solutions that are proven to work in poultry productions like yours—and are backed by a dedicated team of experts.

**Proven Solutions for a Healthy Flock.**

We know a healthy flock is a productive one. Our expansive portfolio of poultry offerings includes proven and effective solutions that help you address important challenges and optimize opportunity to support the health and productivity of your birds. It all starts with the products you need, backed by an unparalleled knowledge of the poultry business to help your birds and your ROI thrive.

**Healthy Flock. Healthy Bottom Line.**

### Our Unique Solutions Help Meet Your Unique Challenges.

Our broad poultry portfolio of proven solutions includes medicated feed additives, mineral nutrition solutions, nutritional specialty products and vaccines for proven results that support a healthier flock.

**Anticoccidial Solutions** A wide range of products from ionophores to chemicals that **are scientifically proven through numerous clinical studies.** Portfolio of affordable, safe and effective intestinal health solutions is proven to help optimize flock health and performance.

**Phivax® ChickPak** Hatchery Vaccination Offering **to protect against three of the major poultry diseases:** **MB-1™** an evolution in IBD hatchery vaccination. A broad portfolio against Infectious bronchitis (IB), including **TAbic® IBVAR206** leading vaccine vs. variant 2 field strains. **Nectiv® Forte** and **TAbic V.H.** offers a solid and long lasting protection to Newcastle disease (ND). **V.H.+H-120** the right balance from day one to protect against ND and IB.

**Magni-Phi®** A natural alternative that helps **promote intestinal integrity and optimize nutrient absorption,** helping to address challenges in antibiotic free production systems.

**Magni-Phi** helps improve immune response, which can lead to healthier birds with a better ability to resist diseases and infections

**Provia™ Prime** A new direct-fed microbial (DFM) for poultry that helps optimize the animal's microbiome, which results in **increased body weight and improved feed conversion.** An optimized microbiome may also lead to lower mortality rates and reduce lesions from pathogens in commercial poultry production. **As a non-antibiotic** option, **Provia Prime** helps the poultry industry meet growing consumer demand for antibiotic-free foods, maneuver increasingly complex regulations and help reduce the need for antibiotic use.

**AB20®** OMRI-listed **aluminosilicate that supports improved feed management** with the consistent quality and performance that your operation demands. Effective performance and excellent flowability are available at a low usage rate for enhanced value from the start—with research-proven consistency and safety across all applications and overall improved feed management.

**Cellerate Yeast Solutions®** Portfolio of **yeast based products** that help support critical gut health and help lay the foundation for better nutrient absorption. Backed by science, we are committed to providing quality that rises above the industry standard to deliver optimal results. When fed daily, **CellerateYeast Solutions** can **help improve digestion** for overall improved health and productivity.

**GemStone®** Highly bioavailable organic trace minerals that have been specifically formulated for current feeding programs. **GemStone** technology combines years of leadership in the mineral business along with the research expertise customers have come to expect.
