

## **Outstanding Products Start With Outstanding Ingredients.**

OmniGen products are combinations of selectively sourced ingredients, including all-natural aluminosilicates, yeast components and other ingredients—all produced using Phibro's formulation expertise and unique processing technologies. Effectiveness and consistency of all OmniGen nutritional specialty products are maintained through our rigorous Dynamic Quality Assurance® program.

## We've Got Your Back.

The success of your organic dairy operation is directly related to the success of your herd. With Phibro Animal Health Corporation as your partner, you can count on OmniGen Green to help achieve the results you want.

## **OmniGen Green. Quality Organic. Optimized Profit.**

As an organic dairy producer, you know the dedication and standards needed to maintain a healthy herd and provide quality organic dairy products in a socially responsible way. OmniGen<sup>™</sup> Green nutritional specialty product includes a combination of all-natural silicates and yeast components, scientifically evaluated and selected by Phibro for specific biological activity to support immune competence.

organic rations can help support immune function, which can lead to fewer infectious and metabolic diseases in your herd-for the quality organic milk you need, with the optimized profitability you want.

## Your New Organic Solution.

Adding OmniGen Green to your dairy cows' diet helps maintain immune competency, with expected improvement in nutrient metabolism through optimal ruminal fermentation and by maintaining gastrointestinal tract integrity. This can help:

- Increase milk and component yield per cow
- Decrease discarded milk
- Improve milk value (\$/cwt) and increase percentage fat and protein
- Lower somatic cell counts (SCC)
- Reduce disease treatment expenses (homeopathic interventions, labor and veterinary)
- Reduce reproductive expenses (hormones, semen, labor and veterinary)
- Lower replacement costs (fewer involuntary culls)
